

# Will A Small County In Northern Michigan Be The Key To Overturning The Nation's Election Results? America Should Find Out On Monday

The untold story of a battle to reveal the truth about Dominion voting machines is brewing in Michigan, and not surprisingly, it's getting very little coverage by the mainstream media.

In a solidly red county in northern Michigan where Trump banners, flags, and yard signs can be found in almost every front yard, voters woke up to discover Joe Biden had walloped President Trump, only to find out shortly

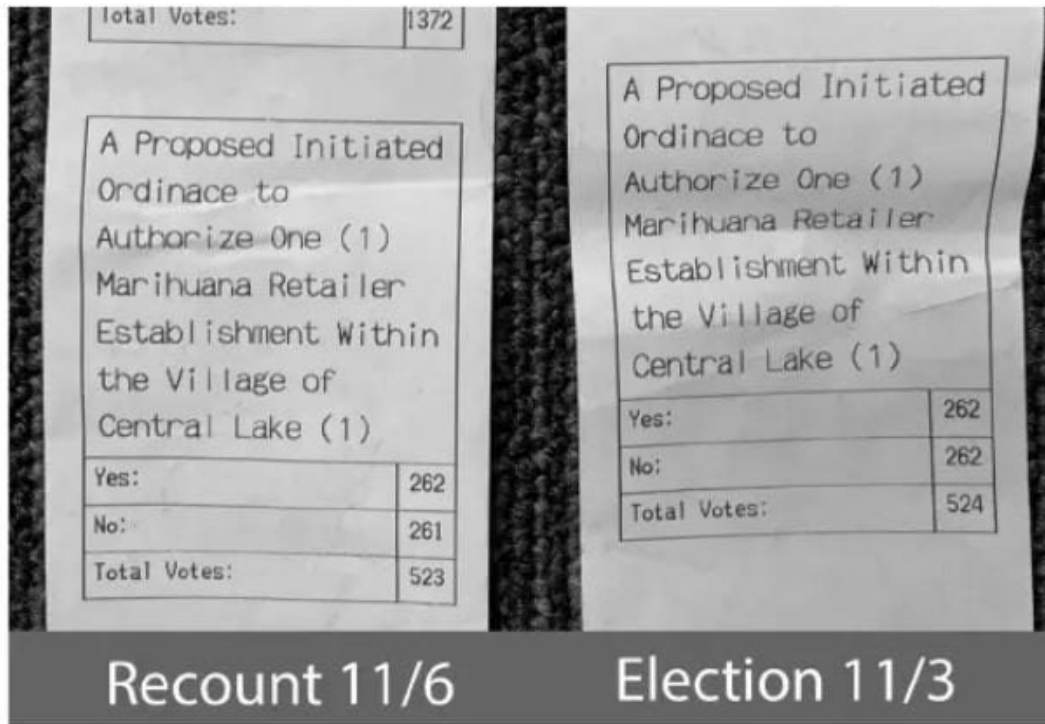

later that Dominion voting machines flipped thousands of votes cast for Trump to his Democratic challenger Joe Biden. The media called it a “glitch” and blamed it on human error.

Earlier this week, we reported about the lawsuit filed by Matthew DePerno of DePerno Law on behalf of Central Lake resident William Bailey. In addition to thousands of votes that were flipped from President Trump to Democrat candidate Joe Biden, Bailey was concerned about ballots that were re-run through the Dominion tabulator machine after a 262-262 tie on a vote a ballot initiative that would allow a marijuana establishment to be located within the Village of Central Lake.

While ballots were being inserted into the machine, 3 of the ballots were destroyed and were not placed through the tabulator. At the conclusion of the recount by the tabulating machine and with three fewer votes, the result was 262-261, and the initiative passed. Of course, this result could only be possible after 3 of the ballots were destroyed.

- A Proposed Initiated Ordinance to Authorize One (1) Marihuana (sic) Retailer Establishment Within the Village of Central Lake (1). – On election night, it was a tie vote. Then, on the recount, when 3 ballots were not counted, the proposal passed with 1 vote being removed from the No vote.

Two more unexplainable vote counts in Antrim County also left voters stunned by the unexplainable outcome of the vote result by Dominion. In Central Lake's School Board election, 742 votes were added to the total after a recount on November 6. (First image below)

Dominion's vote totals showed 663 people voted in a district where there were only 6 eligible voters and only 3 of those 6 actually voted. Somehow, Dominion added 660 additional votes to the final tally. (Second image)

- For the School Board Member for Central Lake Schools (3) there were 742 votes added to this vote total. Since multiple people were elected, this did not change the result of both candidates being elected, but you do see a change in who had more votes. If it were a single person election, this would have changed the outcome, but this goes to the fact that votes can be and were changed during the second machine counting.

School Board Member for Central Lake Schools (3)	
Melanie Eckhardt:	852
Keith Shafer:	846
Write-in:	112
Total Votes:	1810

**Recount 11/6**

School Board Member for Central Lake Schools (3)	
Melanie Eckhardt:	519
Keith Shafer:	525
Write-in:	24
Total Votes:	1068

**Election 11/3**

- For the School Board Member for Ellsworth Schools (2) it shows 657 votes being removed from this election. In this case, only 3 people who were eligible to vote actually voted. Since there were 2 votes allowed for each voter to cast, the recount is correct to have 6 votes. But on election night, there is a major calculation issue:

School Board Member for Ellsworth Schools (2)	
Mark Edward Groenink:	3
Christopher Wallace:	3
Write-in:	0
Total Votes:	6

**Recount 11/6**

School Board Member for Ellsworth Schools (2)	
Mark Edward Groenink:	333
Christopher Wallace:	320
Write-in:	10
Total Votes:	663

**Election 11/3**

“Based on all the allegation of fraud, statutory violations, and other misconduct,” DePerno wrote, “it is necessary to immediately permit the plaintiff to take a forensic image of the 22 precinct tabulators, thumb drives, related software, the Clerk’s “master tabulator,” and conduct an investigation of those images, after which a manual recount of the election results and independent audit of the November 3 election may be ordered to ensure the accuracy and integrity of the election.”

In his lawsuit, Matthew DePerno claims that based on the evidence they have provided to the court that Dominion Voting Systems “committed material fraud or error in this election so that the outcome of the election was affected.”

At 5:30 PM on Friday, December 4, 13th Circuit Court Judge Kevin A. Elsenheimer granted permission to William Bailey and his team of IT experts to conduct a forensic study of the 16 Dominion voting machines, tabulators, thumb drives, related software, and the Clerk’s “master tabulator.” In his court order, Bailey was also granted the ability to conduct an independent investigation of the images they obtained in their examination.

Matthew DePerno was able to quickly assemble a team of seven highly trained forensic IT experts who agreed to arrive the next day (Saturday) to conduct the forensic examination.

After 8 hours, the collection was complete. With 16 CF cards (similar to SIM cards), 16 thumb drives, and forensic images of the Dominion voting machines in hand, the IT team was escorted to the local Antrim County Airport by two Antrim County Sheriff vehicles, where they boarded their jet plane with evidence in hand.

DePerno waited patiently for the results of the forensic examination of the Dominion voting machines to arrive. While he was waiting for the results, Michigan’s radical Attorney General Dana Nessel who won her election after bragging she was the best candidate for the job because she didn’t have a penis, added Michigan’s far-left, dishonest Secretary of State Jocelyn Benson to the lawsuit as a defendant on Wednesday.

On Friday, Constitutional Attorney Matthew DePerno, who is now in possession of the initial preliminary results of the forensic examination of the Dominion voting machine, 16 CV data cards, and 16 thumb drives from the Dominion machines, filed an emergency order asking Judge Kevin Elsenheimer to lift the protective order prohibiting him from sharing the

results of the inspection, calling it a matter of “national security.” In his emergency motion, DePerno reminds the judge that time is of the essence, as the deadline for electors to vote for the next President is Monday, December 14, 2020.

**4. Initial and preliminary results**

Plaintiff's attorney has received initial preliminary results which are important for the public, the US government, and the Michigan legislature to review and understand. The deadline of Monday, December 14, 2020 is imminent regarding the certification of the election. These results have an impact on the 2020 election, which is an issue of national security. These issues regarding the accuracy, integrity, and security are of great public interest and override any concerns regarding reverse engineered data.

In his order, Deperno states that Secretary of State Benson has refused to permit a forensic examination of the Dominion software, presumably because she is fearful of violating the Licensing agreement with Dominion. DePerno points out that the agreement produced by Antrim County was not signed and that they have not been able to verify that the contract was actually signed.

5. **MCL 168.797c**

Effective March 1, 2016, the State of Michigan entered into a "Voting System Hardware, Software and Services Contract" with Dominion Voting Systems, Inc.<sup>1</sup> No counties signed the agreement. Schedule B is a "License Agreement." This agreement states that the State of Michigan "shall not, without the prior written permission of Licensor:

4.1 Transfer or copy onto any other storage device or hardware or otherwise copy the Software in whole or in part except for purposes of system backup;

4.2 Reverse engineer, disassemble, decompile, decipher, or analyze the Software in whole or in part.

In other words, the Contract prevents the State of Michigan from "looking under the hood" at how the software functions and what algorithms are used to compute the vote in any election, including the 2020 election.

The Secretary of State has refused to analyze the software, presumably because she is fearful of violating the License Agreement. However, this License Agreement violates MCL 168.797c, which states:

**168.797c Computer program; disposition and use of source code.**

Sec. 797c

A person or company providing a computer program that examines, counts, tabulates, and prints results of the votes cast by a voter on an electronic voting system shall place in an escrow account a copy of the source code of the program and any subsequent revisions or modifications of the source code. The secretary of state or an authorized agent of the secretary of state shall agree to use the information contained in the source code solely for the purpose of analyzing and testing the software and shall not disclose proprietary information to any other person or agency without the prior written consent of the vendor.

<sup>1</sup> Defendant Antrim County produced a copy of the Contract without signature. Plaintiff and his attorney have not verified that the Contract was actually signed.

DePerno asked for the preliminary results of the election to be released to the people of Antrim Co, of the State of MI, of the USA, and to the President and Vice President of the United States, as well as Chad Wolf, Sec. of Homeland Security and DNI John Ratcliff.

On December 6, 2020, Plaintiff's forensic team collected forensic images of certain equipment in the Antrim County Clerk's office, including CF cards, thumb drives, and master tabulator. The forensic team has no compiled a preliminary report of the findings. Based on the findings, Plaintiffs hereby requests permission to release the preliminary information to the following:

- people of Antrim County
- people of the State of Michigan
- people of the United States of America
- President of the United States
- Vice President of the United States
- Mike Pompeo, Secretary of State
- Chad Wolf, Secretary of Homeland Security
  
- John Ratcliffe, Director of National Intelligence

This is an issue of national security. Our voting system is defined as "national critical infrastructure." This is also an issue that directly relates to the Michigan and certification that is required prior to or on Monday, December 14, 2020.

In his emergency order, DePerno argues that the protective order placed on sharing the forensic examination results was to prevent the plaintiff from reverse engineering Dominion's software for malicious purposes. DePerno argues that his plaintiff, Mr. Bailey, and his IT team have no intention of reverse-engineering the software for malicious purposes. Mr. DePerno adds, "the public interest weighs in favor of granting the Plaintiff's preliminary injunction." He explains, "The Court believes that confirming the accuracy, integrity, and security of the electoral process is a greater public interest at this juncture than the potential misuse of reverse engineering data."

Later today, Attorney Matthew DePerno received word that 13th Circuit Court Judge Kevin A Elseneheimer would hear his case. Curiously, DePerno, who filed the emergency motion, found out about the hearing when he saw an article published by the far-left [Detroit Free Press](#) at 2:13 PM. DePerno then received an email from Antrim County attorney Haider Kazim at 2:50 PM and received notice directly from the Court at 3:02 PM. According to DePerno, the hearing will take place at 8:30 AM EST on Monday.
